

TriStar® Waterfall

HIGH-PERFORMANCE PUMP SERIES

Spectacularly quiet, powerful
& energy efficient.

Waterfalls are truly one of nature's most impressive feats, even the small ones. The shimmering cascade of water over rock is at once exciting and soothing. It's no wonder backyard versions are so popular.

Our low-head/high-flow TriStar Waterfall Pumps are specifically designed for large-volume waterfall and negative-edge applications. Offered in two sizes, 75 gpm and 120 gpm, they run 60% quieter and use 60% less electricity than standard single-speed pumps.

TriStar® Waterfall Pump

Applications

- In-ground waterfalls that require low head applications and up to 75 or 120 gallons per minute

Features

- Runs 60% quieter and uses 60% less electricity than standard single-speed pumps
- Low-head/high-flow specifically designed for large volume waterfall and negative-edge applications
- 2" x 2 1/2" union connections make installation and servicing fast and easy
- No-rib design insures easy debris removal. Extra leaf-holding capacity basket extends time between cleanings.
- Tri-Lock cam and ramp strainer cover design seals with less than a quarter turn.
- Pressure testable to 50 psi maximum

Note: The TriStar Waterfall pumps are low-head, high-flow pumps. The piping system should be designed such that the discharge of the waterfall, spillway or cascade is no more than 10 feet above the surface of the water in the pool.

MODEL NUMBER FULL RATED ENERGY-EFFICIENT	Pump Output (GPM) vs Total Resistance to Flow (Feet of Head)				
	10 ft.	15 ft.	20 ft.	25 ft.	30 ft.
