THE EASIEST WAY TO REPLACE PENTAIR® OR JANDY® HEATERS

REPLACE JANDY OR PENTAIR HEATERS—NO RE-PLUMBING REQUIRED.

Hayward® Universal H-Series heaters offer major energy and cost savings compared to other leading brands—and it's never been easier to upgrade from a Pentair or Jandy heater to a Universal H-Series heater than with this first-of-its-kind adapter kit. It eliminates the need for site re-plumbing of water piping attached to the equipment pad, saving both time and hassle.

ELIMINATES THE NEED FOR RE-PLUMBING

Replace an existing Pentair MasterTemp® or Jandy JXi™ gas heater with a Hayward Universal H-Series using the adapter kit—it's compatible with existing water plumbing connections for a simple switch.

INCREASED ENERGY EFFICIENCY

Upgrading from a Jandy or Pentair heater to a Universal H-Series greatly decreases heater pressure drop, meaning less energy is used for better overall heating performance.

COMPACT DESIGN

The innovative, low-profile configuration of the adapter allows Universal H-Series heaters to be seamlessly installed in existing pool pads without the need for additional piping or equipment space.

SPECIFICATIONS

KIT NUMBER	DESCRIPTION
UHXWJAK1930	Adapter Kit to replace Jandy JXi Heater with Universal H-Series Heater
UHXWPAK1930	Adapter Kit to replace Pentair MasterTemp Heater with Universal H-Series Heater
